

# Distilling PostScript® files using Distiller X

## STEP 1

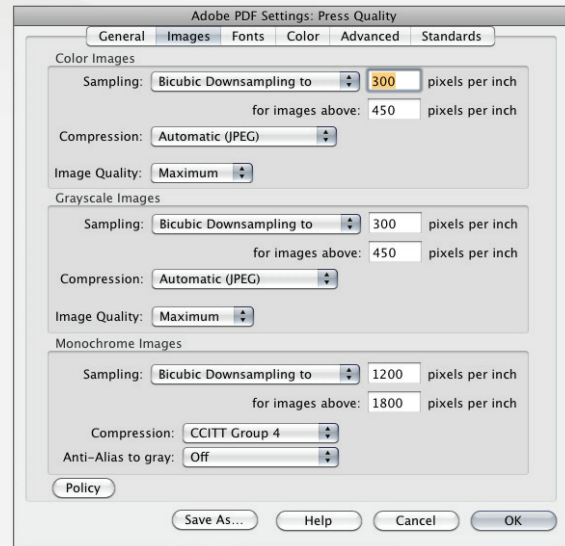

- Start by selecting **Press Quality** under Default Settings
- Then under **Settings** select **Edit Adobe PDF Settings**

## STEP 3 COLOR TAB

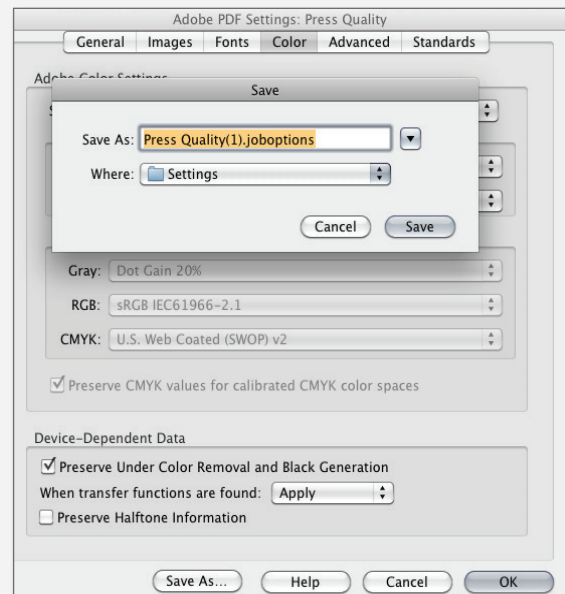

- Change Color Management Policies to **Leave Color Unchanged**

## STEP 2 IMAGES TAB

- Leave **General** tab as is
- Set **Images** tab to match settings shown
- Next, click **Color** tab

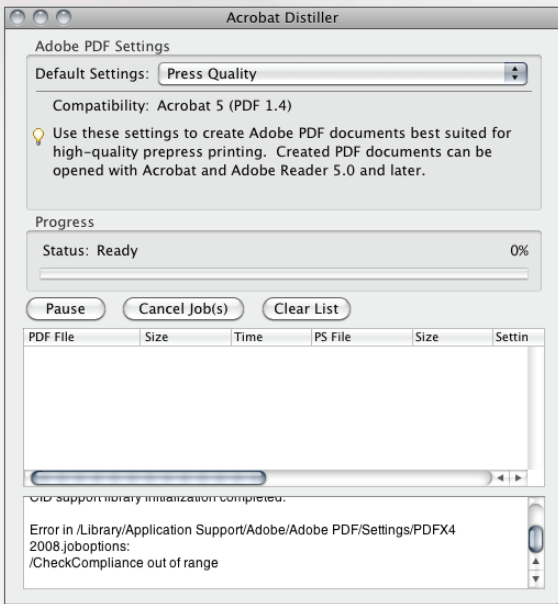

## STEP 4

- Click **OK**, name your new settings and click **Save**
- This is the setting you will choose when you drag and drop your PostScript® file for distilling

# Distilling PostScript® files using Distiller X

## STEP 5

- Choose your newly created setting from the drop down menu
- Drag and drop your PostScript® file into Distiller
- The file will be distilled into a press quality PDF
