Reindl Adds Digital Printing Capabilities To Complement Its Production Offerings

Merrill, WI – In June of 2007, Reindl began installation of its newly acquired Kodak Digimaster EX150. The installation of this monochrome digital press will allow Reindl to improve its short run sheetfed capacity and expand its offering to allow for variable data projects, imprinting of color masters, online order process and numerous other exciting processes that come with movement to this technology.

While growing, we've remained focused on earning the trust and patronage of clients from across the country. Our dedication to helping clients solve their graphic communication challenges has never been stronger. Our commitment to setting the standard in providing quality products and customer satisfaction has not faltered. Our purpose is unchanged: To provide maximum value to our clients while maintaining the highest ethical standards.

Reindl provides a wide range of products to corporate, retail, industrial and agency clients throughout the Midwest and nationwide. Reindl is renowned for its high-caliber corporate communications, direct mail pieces, packaging and advertising materials. However, it's our commitment to customer satisfaction that sets us apart. When high technology, skilled machine operators, top-notch project management and constant awareness of the customer's needs can be found under one roof, it's a powerful combination.

We call it Precision-Engineered Print Services — our most important capability.

Kodak markets numerous monochrome and color digital printing presses, as well as offering film and other graphic arts products. For more information, contact KODAK at (800) 800-913-6796. Information also can be obtained by visiting the company's website at www.kodak.com.
