Reindl Adds Six-Color Komori Lithrone 6/29 To Complement Its Production Capabilities

Merrill, WI – July 15, 2006 – In July of 2006, Reindl began installation of its newly acquired Komori Lithrone LS 6/29. The installation of this six-color, 29-inch press has allowed Reindl to improve its sheetfed capacity by retiring a 1990s-vintage press that had lost some of its efficiencies.

While growing, we've remained focused on earning the trust and patronage of clients from across the country. Our dedication to helping clients solve their graphic communication challenges has never been stronger. Our commitment to setting the standard in providing quality products and customer satisfaction has not faltered. Our purpose is unchanged: To provide maximum value to our clients while maintaining the highest ethical standards.

Reindl provides a wide range of products to corporate, retail, industrial and agency clients throughout the Midwest and nationwide. Reindl is renowned for its high-caliber corporate communications, direct mail pieces, packaging and advertising materials. However it's our commitment to customer satisfaction that sets us apart. When high technology, skilled machine operators, top-notch project management and constant awareness of the customer's needs can be found under one roof; it's a powerful combination.

We call it Precision-Engineered Print Services – our most important capability.

Komori USA markets multicolor sheetfed and web lithographic presses. For more information, contact KOMORI AMERICA at (847) 806-9000. Information also can be obtained by visiting the company's website at www.komori-america.us.
